

I am a listener and supporter of Air 1 radio station on 90.1 FM in Riverside California.

Air 1 is an important part of my family's daily activities.

I can turn it on and not worry that my 4 and 2 year old will be hearing something they shouldn't have to hear.

It gives my family an uplifting message with out the constant barrage of commercials of questionable content.

On other stations even the "Family friendly" programs are airing commercials for products, programs and events that are inappropriate for children. The music is uplifting yet contemporary. My children are exposed to positive role models not the promiscuous teen idols singing suggestive or violent lyrics.

Air 1 keeps us informed about local activities and events.

they broadcast news and discuss current events that are important to my family.

If you displace Air 1 with an LPFM you will be taking away our alternative to the graphic and often raunchy programming offered on other stations.

Air 1 is a listener supported station and survives on donations.

It is obvious that the public wants to hear Air 1 as they continue to donate the funds necessary to keep it on the Air.

The positive and uplifting message Air 1 provides is a breath of fresh air in opposition to the vulgar, crude and tasteless programs polluting the airwaves.

The public needs a choice, allowing the displacement of Air 1 with an LPFM is against what the public wants, therefore not in the best interest of the public.

Regards,
Rebecca Spartos
